

Introducing SolarVu Lite

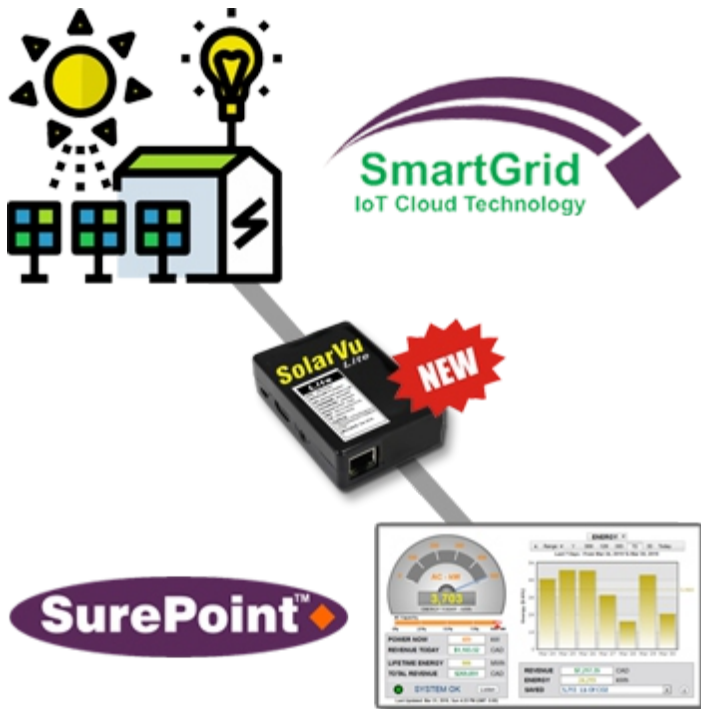

Have a portfolio of smaller solar sites which were previously uneconomical to monitor? We have a new, economical, low cost hardware solution for you!

Introducing new SolarVu Hardware

We have been working on new hardware to deliver the value of SolarVu for sites which otherwise would be too expensive to monitor! Our new hardware lowers the initial capital cost of monitoring equipment. This works great for large groups of low kWp systems, like MicroFITs!

SolarVu[®]

Lite

What's the same:

- Live monitoring of energy, revenue, status
- All SolarVu O&M Standard Features like **Inverter Status**, **Equipment Log**, **PowerWatch** are available
- Viewable in **SMART Enterprise** view to see your whole portfolio
- All the features of **SurePoint** are available

What's different:

- Up to 30 kWp!
- Support 1-2 small string inverters
- Easy to install
- More economical

Contact us for your quotes on SolarVu Lite! Let us know about your unmonitored projects!
